EXPERIENCE

DEXGame, Glattbrugg

January 2023 - October 2023

Front-End Developer

- I coded the frontend project for the Gplex product at DEXGame company. During the development, I utilized ReactJS, GraphQL, and SCSS technologies. The Gplex product I coded is a Web3-based e-gaming platform. By contributing to this project, I gained valuable experience in integrating blockchain technology into the entertainment sector and continue to enhance my skills in this area.

Aila, Remote

1 year 2 months

Back End Developer

September 2022 - October 2023

- I spearheaded the development of the Aila project's REST API using Golang, overseeing its maintenance alongside the entire database infrastructure. Additionally, I employed Docker for seamless deployment.

Frontend Developer

September 2022 - October 2023

- I was responsible for both the mobile and web aspects of the Aila project, utilizing Expo (React Native) for mobile development and leveraging React and TypeScript for web development.

Co-Founder

September 2022 - October 2023

- As a co-founder, I oversaw team management and facilitated meetings while actively pursuing business development opportunities and securing investments for the Aila project.

Wope, Tallinn

August 2022 - October 2022

Backend Developer

- I had the opportunity to work within a microservices architecture, where I spearheaded the development of an artificial intelligence-integrated microservice using Golang. In this project, I focused on conducting a SERP (Search Engine Results Page) analysis.

VirtualMetric B.V., Amsterdam

March 2021 - June 2022

Software Engineer (Front-End)

- VirtualMetric is a secure real-time infrastructure monitoring solution, which enables you to easily manage your software and hardware assets.
- Used Technologies:

- - React with TypeScript - React Query - styled-components - i18next - Jest & Enzyme & Testing Library
